

INDEX TO VOLUME 101

New scientific names are in bold face.

- Acalypha* in North America 217-233;
monostachya 217-222; *phleoides*
 222-223; *virginica* 223-231; key
 to species of *virginica* group 229-
 230; taxonomic treatment 230-
 231
- Acer platanoides* (Norway maple),
 invasion of 264-273
- Acer saccharinum* 105-135
- Acer saccharum*, distribution in re-
 lation to disturbance 267-271
- Algae, freshwater *Vaucheria* 234-
 263
- Allain, Larry K., Michael S. Zavada,
 and Douglas G. Matthews. The re-
 productive biology of *Magnolia*
grandiflora. 143-162
- Al-Shehbaz, Ihsan A. and Suzanne I.
 Warwick. *Cardamine georgiana*
 (Brassicaceae), a new name re-
 placing *Dentaria microphylla*.
 274-276
- ANOVA, analysis of molecular var-
 iance 331-334
- Andean species, *Jaltomata lojae*, sp.
 nov. 136-142
- Anderson, Rebecca. Disturbance as a
 factor in the distribution of sugar
 maple and the invasion of Norway
 maple into a modified woodland.
 264-273
- ANNOUNCEMENTS:
 New England Botanical Club
 Graduate Student Research
 Award 318
 Humboldt Field Research Institute
 Prize 319
- Aquatic vegetation in Clinton Har-
 bor, CT 40-45
- Barnstable County, MA, new record
 for *Asclepias purpurascens* 300-
 301
- Bees on *Magnolia grandiflora* 152-
 155
- Bennett, James P. and Clifford M.
 Wetmore. Covariance of Lichen
 and Vascular Plant Floras. 277-
 297
- Bidens discoidea*: An epiphyte in
 Massachusetts floodplain ponds.
 Notes on the habits and life-his-
 tory of, 298-299 (New England
 Note)
- Blanchard, F. H., flora collected in
 1880s Caledonia County, VT 360-
 418
- Bog in Massachusetts 341-359
- Bog in Michigan 46-86
- Bolivia, *Myriophyllum mattogros-
 sense* in 28-39
- BOOK REVIEWS:
 Discovering the Unknown Land-
 scape: A History of America's
 Wetlands. 306-608
 Flora of Maine: A Manual for
 Identification of Native and
 Naturalized Vascular Plants of
 Maine. 309-310
 Proceedings of a Symposium on
 the Recovery and Future of the
 Northeastern Forest, Connecti-
 cut College, April 12, 1997.
 303-305
 Savage Garden: Cultivating Car-
 nivorous Plants. The, 92-94
 Wild Orchids Across North Amer-
 ica: A Botanical Travelogue.
 206-207
- Boraginaceae 16-27
- Bryophytes in Michigan peatland
 46-86
- Caledonia County, VT, flora of 360-
 418
- Capers, Robert H. 419-423
- Cardamine georgiana* (Brassica-
 ceae), a new name replacing *Den-
 taria microphylla*. 274-276

- Cardamine georgiana* (Brassica-
 ceae), a new name replacing *Den-
 taria microphylla*. 274-276

- Cardamine georgiana*, nom. nov. 274-276
- Carex* section *Scirpinae* 163-199;
curatorium 193; *gigas* 163-166;
scrabriuscula 163-166; *scirpoidea*
 163-199; ssp. *scirpoidea* 169; ssp.
pseudoscirpoidea 182; ssp. *convoluta* 186; ssp. *stenochlaena* 189;
 taxonomic treatment 167; key to
 168-169
- Carlson, John K. 40-45
- Carr, Robert L. 16-27
- Centennial reflections 1-15
- Classification of floodplain forests in
 Massachusetts 105-135
- Clinton Harbor, submerged aquatic
 vegetation in 40-45
- Communities of floodplain forests in
 Massachusetts 105-135
- Communities of peatlands 341-359
- Coniferophyta 376 (families in al-
 phabetical order)
- Connecticut 40-45, 234-263, 302
- Connecticut, freshwater *Vaucheria*
 234-263
- Connecticut, submerged aquatic veg-
 etation in 40-45
- Conservation 325-340
- Covariance of lichen and vascular
 plant floras. 277-297
- Crow, Garrett E. 46-86, 163-199
- Crow, Garrett E. and Nur P. Ritter.
Myriophyllum mattogrossense
 (Haloragaceae), a rare lowland
 watermilfoil new to Bolivia. 28-
 39
- Cyperaceae 163-199
- Cyperus microiria*: a new addition to
 the flora of Connecticut. 302 (New
 England Note)
- DECORANA 105-135
- Dentaria microphylla*, name replaced
 274-276
- DiGregorio, Mario J. 300-301
- Distribution and density of sub-
 merged aquatic vegetation beds in
 a Connecticut harbor. 40-45
- Distribution of Norway maple and
 sugar maple in response to distur-
 bance 264-273
- Distribution of the bryophytes and
 vascular plants within Little Dollar
 Lake peatland, Mackinac County,
 Michigan. The, 46-86
- Disturbance as a factor in the distri-
 bution of sugar maple and the in-
 vasion of Norway maple into a
 modified woodland. 264-273
- DNA sequencing in *Liquidambar*
 87-91
- Donoghue, Michael J. 87-91
- Dunlop, Debra A. and Garrett E.
 Crow. The taxonomy of *Carex*
 section *Scirpinae* (Cyperaceae)
 163-199
- Edible fruit, *Jaltomata lojae* 136-
 142
- Endangered species, *Geum* 325-340
- Epiphyte, *Bidens discoidea* in flood-
 plain ponds 298-299
- Equisetophyta 372-373
- Euphorbiaceae, *Acalypha* 217-233
- Fen in Michigan 46-86
- Floodplain forests in Massachusetts
 105-135, 200-205
- Floodplain ponds, *Bidens discoidea*
 life-history in 298-299
- Flora 356-359, 371-418
- Flora of a peatland in Massachusetts
 356-359
- Floral biology of *Jaltomata lojae*
 136-142
- Floras, covariance of lichen and vas-
 cular 277-297
- Floristics 341-359
- Freshwater species of *Vaucheria*
 (Tribophyceae, Chrysophyta) from
 Connecticut. The, 234-263
- Genetic evidence supporting the tax-
 onomy of *Geum peckii* and *G. ra-
 diatum* as separate species. 325-
 340
- Georgia, *Cardamine georgiana*
 274-276

- Geum peckii* 325-340; *radiatum* 325-340
- Gilman, Arthur V. The vascular flora of Caledonia County, Vermont. 360-418
- Hackelia venusta* 16-27
- Haloragaceae 28-39
- Harrod, Richy J., Lauri A. Malmquist, and Robert L. Carr. A review of the taxonomic status of *Hackelia venusta* (Boraginaceae). 16-27
- Hellquist, C. Eric and Garrett E. Crow. The distribution of the bryophytes and vascular plants within Little Dollar Lake peatland, Mackinac County, Michigan. 46-86
- Herkogamy in *Jaltomata lojae* 136-142
- Hickler, Matthew G. 341-359
- Hickler, Matthew G. Notes on the habits and life-history of *Bidens discoidea*: An epiphyte in Massachusetts floodplain ponds. 298-299 (New England Note)
- Hydrocharitaceae 419-423
- Interspecific relationships, molecular evidence in *Liquidambar* 87-91
- Inventory and vegetation classification of floodplain forest communities in Massachusetts. 105-135

- Kearsley, Jennifer B. Inventory and vegetation classification of floodplain forest communities in Massachusetts. 105-135
- Kearsley, Jennifer B. Rare and non-native plants of Massachusetts' floodplain forests. 200-205 (New England Note)
- Lane, Christopher E. 234-263
- Les, Donald H. and Robert S. Capers. *Limnium spongia* (Hydrocharitaceae) discovered in New England. 419-423 (New England Note)
- Levin, Geoffrey A. Notes on *Acalypha* (Euphorbiaceae) in North America. 217-233
- Li, Jianhua and Michael J. Donoghue. More molecular evidence for interspecific relationships in *Liquidambar* (Hamamelidaceae). 87-91 (Note)
- Lichens, covariance with vascular floras 277-297
- Life-history of *Bidens discoidea*: An epiphyte in Massachusetts floodplain ponds. Notes on the habits of, 298-299 (New England Note)
- Liliopsida 358-359, 376-390 (families in alphabetical order)
- Limnium spongia* 419-423
- Limnium spongia* (Hydrocharitaceae) discovered in New England. 419-423 (New England Note)
- Liquidambar* 87-91
- Little Dollar Lake peatland 46-86
- Long Island Sound, submerged aquatic vegetation in 40-45
- Lycopodiophyta 371-372 (families in alphabetical order)
- Mackinac County, Michigan, peatland communities in 46-86
- Magnolia grandiflora* 143-162
- Magnoliophyta 356-359, 376-418 (families in alphabetical order)
- Magnoliopsida 356-358, 390-418 (families in alphabetical order)
- Malmquist, Lauri A. 16-27
- Massachusetts 105-135, 200-205, 264-273, 298-299, 300-301, 341-359
- Massachusetts peatland 341-359
- Massachusetts, floodplain forests of 105-135, 200-205
- Massachusetts, habits and life-history of *Bidens discoidea* 298-299
- Matthews, Douglas G. 143-162

- Michigan, distribution of bryophytes and vascular plants within Little Dollar Lake peatland 46-86
- Middlesex Fells Reservation, distribution of maples in response to disturbance 264-273
- Mione, Thomas and Luis A. Serazo. *Jaltomata lojæ* (Solanaceae): Description and floral biology of a new Andean species. 136-142
- More molecular evidence for interspecific relationships in *Liquidambar* (Hamamelidaceae). 87-91 (Note)
- Mrocza, Matthew E. 40-45
- Myriophyllum mattogrossense* (Haloragaceae), a rare lowland water-milfoil new to Bolivia. 28-39
- Myriophyllum mattogrossense* 28-39; key to the South American species of *Myriophyllum* 37-39
- National Parks of the Great Lakes, covariance of lichen and vascular floras 277-297
- NEBC Meeting News 95-100, 208-212, 311-317, 424-427
- New addition to the flora of Connecticut, *Cyperus microiria* 302
- New Barnstable County, MA, record for *Asclepias purpurascens*. A, 300-301 (New England Note)
- New England, *Limnium spongia* discovered in 419-423
- New record for *Asclepias purpurascens* in Barnstable County, MA 300-301
- New record for Bolivia, *Myriophyllum mattogrossense* 28-39
- New record in New England, *Limnium spongia* 419-423
- Non-native plants in Massachusetts 200-205
- Norland, Anna 234-263
- Notes on *Acalypha* (Euphorbiaceae) in North America. 217-233
- Notes on the habits and life-history of *Bidens discoidea*: An epiphyte in Massachusetts floodplain ponds. 298-299 (New England Note)
- Ordination of floodplain forest species 105-135
- Osmophores in *Jaltomata lojæ* 136-142
- Paterson, Ian G. and Marlene Snyder. Genetic evidence supporting the taxonomy of *Geum peckii* and *G. radiatum* as separate species. 325-340
- Peatland 46-86, 341-359
- Pinophyta 356
- Plant communities and vascular flora of the peatland within Poutwater Pond Nature Preserve. The, 341-359
- Pollinators of *Magnolia grandiflora* 152-155
- Polloni, Pamela 300-301
- Polypodiophyta 356, 373-375 (families in alphabetical order)
- Poutwater Pond Nature Preserve, communities and flora of peatland in 341-359
- Randall, Todd A., John K. Carlson, and Matthew E. Mrocza. Distribution and density of submerged aquatic vegetation beds in a Connecticut harbor. 40-45
- RAPD 325-340
- Rare and non-native plants of Massachusetts' floodplain forests. 200-205 (New England Note)
- Rare and protected species in Vermont 360-418
- Rare species 16-27, 200-205, 360-418
- Reflections on 100 years of *Rhodora*. 1-15
- Reproductive biology of *Magnolia grandiflora*. The, 143-162
- Review of the taxonomic status of *Hackelia venusta* (Boraginaceae). A, 16-27
- Reviewers of manuscripts 428

- Ritter, Nur P. 28-39
 Rosaceae 325-340
Ruppia maritima 40-45
- Schall, Donald G., Mario J. Di-Gregorio, and Pamela Polloni. A new Barnstable County, MA, record for *Asclepias purpurascens*. 300-301 (New England Note)
- Schneider, Craig W., Christopher E. Lane, and Anna Norland. The freshwater species of *Vaucheria* (Tribophyceae, Chrysophyta) from Connecticut. 234-263
- Searcy, Karen B. and Matthew G. Hickler. The plant communities and vascular flora of the peatland within Poutwater Pond Nature Preserve. 341-359
- Serazo, Luis A. 136-142
- Snyder, Marlene 325-340
- Solanaceae 136-142
- Species-area curves 277-297
- Sphagnum* in Michigan 46-86
- Sullivan, Janet R. Reflections on 100 years of *Rhodora*. 1-15
- Taxonomic status of *Hackelia venusta*, a review 16-27
- Taxonomy of *Carex* section *Scirpinae* (Cyperaceae). The, 163-199
- Taxonomy of *Geum peckii* and *G. radiatum*, genetic evidence 325-340
- Terrestrialization in Michigan peatland 46-86
- Tribophyceae 234-263
- TWINSPAN (two-way indicator species analysis) 46-86, 105-135, 341-359
- Vascular flora of Caledonia County, Vermont. The, 360-418
- Vascular plants, covariance with lichen floras 277-297
- Vaucheria* in Connecticut 234-263; *aversa* 238-239; *bursata* 239-240; *compacta* var. *compacta* 240-241; var. *dulcis* 241-242; *frigida* 242-244; *geminata* 244-245; *prona* 245-247; *taylorii* 247-249; *uncinata* 249-250; *undulata* 250-253; key to 253-254; distribution maps 255-259
- Vaucheriaceae 234-263
- Vermont, flora of Caledonia County 360-418
- Warwick, Suzanne I. 274-276
- Washington State, taxonomic status of *Hackelia venusta* 16-27
- Watermilfoil 28-39
- Wenatchee National Forest, taxonomic status of *Hackelia venusta* 16-27
- Wetmore, Clifford M. 277-297
- Zavada, Michael S. 143-162
- Zebryk, Tad M. *Cyperus microiria*: a new addition to the flora of Connecticut. 302 (New England Note)
- Zostera marina* 40-45
